BHAVANA BIRADAR

Bengaluru, India | bhavanabiradar38@gmail.com | github.com/bhavanabiradar

CAREER OBJECTIVE

Second-year Electronics and Communication Engineering student seeking a software development internship. Interested in building practical applications, solving problems through programming, and continuing to grow as a developer.

EDUCATION

RNS Institute of Technology (RNSIT), Bengaluru — B.E. in Electronics and Communication Engineering

Second Year | CGPA: **8.5/10** | Expected Graduation: **2029**

TECHNICAL SKILLS

Programming Languages: C, Python, JavaScript

Web Development: React, Node.js, MongoDB

Tools: Git, GitHub

PROJECTS

AI/ML-Based Intelligent Anomaly Detection for Automatic Weather Stations (SIH Project)

- Team project focused on intelligent anomaly detection in Automatic Weather Station (AWS) data. Specific methods and individual implementation details can be added once confirmed.

RealityOS — AI-Powered Productivity Platform

- Contributed ideas, testing, and documentation to a collaborative productivity-platform project.

https://github.com/bhavanabiradar/realityos

MochaTrade — Educational Virtual Trading Simulator

- Collaborated with a team on a virtual trading simulator for educational use.

https://github.com/bhavanabiradar/Mochatrade-V

Smart Blind Stick — Assistive Technology Project

- Collaborative assistive-technology project exploring obstacle detection and feedback to support mobility.

E-Portal for Case Management and Hearings

- Researched communication-system requirements and proposed future enhancements including WebRTC-based virtual hearings, speech-to-text transcription, and multilingual voice interaction. Contribution focused on research and future scope.
